Program Description

The BA program in interdisciplinary arts and performance has been celebrated in the most recent Oxford Handbook of Interdisciplinarity as the leading academic program in defining the interdisciplinary arts. Throughout the curriculum, emphasis is that interdisciplinary arts be outwardly and continually inclusive, expanding, evolving and innovative, which allows students the ability to shape their own creative pathways.

Students in both the online and immersion programs engage with nationally and internationally known faculty in collaborative investigation of many artistic disciplines in preparation for the complex and changing world through current approaches to aesthetic innovation.

Students in this major engage in practical and theoretical studies of visual, sonic, performance, game and interactive arts to become versatile artists.
