As an economics major at ASU learning from world-renowned researchers and award-winning professors, you are equipped with rigorous theoretical and empirical tools that enable you to study the decisions of individuals, businesses and governments.

Program Description

The Department of Economics at ASU provides highest-quality instruction to students, conducts cutting-edge research in economics and provides leadership and service to its professional communities. The department's undergraduate students are provided the critical thinking and communication skills needed to succeed in business, government or graduate school.

The BS program in economics is built on a strong core of economic theory, supplemented by mathematics and data analysis. All students are encouraged to develop programs of study tailored to their individual needs and interests. Students choose from a variety of courses within the department as well as from The College of Liberal Arts and Sciences and the university to broaden their knowledge and skills and individualize their learning experience.

Students currently enrolled in the Bachelor of Science in economics program may not pursue a concurrent degree with the BS in politics and the economy or the BS in economics, offered by the W. P. Carey School of Business, due to the high level of overlap in curriculum. Students should speak with their academic advisor for any further questions.

In addition to the guidelines in the Concurrent Program Options section below, students interested in pursuing concurrent or second baccalaureate degrees in The College of Liberal Arts and Sciences are advised to visit The College's website for more information and requirements.
