Strengthen your foundational skills such as reading comprehension, and develop skills in reasoning and argument construction to become a better thinker. Studying philosophy prepares you to answer moral and ethical questions that relate to a variety of careers.

**Program Description**

The BA in philosophy teaches students how to think well, which in turn lays the foundation for personal and professional success.

Philosophy students learn how to structure arguments, write precisely and clearly, and communicate their ideas in an orderly, persuasive and unambiguous way. Many philosophical texts are complicated, and philosophy courses teach students how to read, comprehend and summarize conceptually difficult material. In short, studying philosophy trains one to be a better, clearer thinker.

Coursework includes the major subfields of philosophy, such as metaphysics, epistemology and ethics, and electives that connect philosophy to other areas of inquiry, emphasizing the social relevance of philosophy.

In addition to the guidelines in the Concurrent Program Options section below, students interested in pursuing a concurrent degree or second baccalaureate in The College of Liberal Arts and Sciences are advised to visit The College's website for more information and requirements.

These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey. Students may learn more about these programs by visiting the admission site: https://admission.asu.edu/transfer/MyPath2ASU.
**Program Learning Outcomes**

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Present and defend a philosophical view using concepts, technical terminology, and methods acquired in an advanced topical seminar as well as skills in logical analysis and civil and respectful argumentation.
- Present and explain central philosophical positions from key figures in the historical development of philosophical thought, especially their metaphysical and epistemological positions.
- Evaluate how well different normative ethical theories such as consequentialism, deontology, virtue theory provide moral standards that dictate which (if any) actions are right and wrong or how well different metaethical theories such as realism, expressivism, relativism, and nihilism account for the meaning and truth of moral claims.
- Evaluate arguments for formal validity and construct formal proofs. Students will be able to capture the logical form of prose arguments.

**Global Opportunities**

**Global Experience**
Students can explore the diverse range of cultures and philosophies around the globe. With over 250 unique programs, students can tailor their study abroad experience to their interests and skill sets.
