

Nutrition, BS

NHNTRBS

ASU is no longer accepting new students to this program. Students interested in nutrition should apply to the [Food and Nutrition Entrepreneurship BS](#) program.

Program description

The BS in nutrition program includes exploration of important emerging topics, including developing an evidence-based online presence through social media, blogging and podcasting; creating stand-alone businesses in nutrition, such as individual practices and consulting programs; and entrepreneurship in the food industry through development of new products and services.

Experiential learning is integrated into the program's curriculum; students have opportunities to work with external stakeholders and community partners specializing in food and nutrition entrepreneurship to gain real-world experience, develop professional relationships, and establish a foundation and direction for their future careers.

This program prepares students to work in the expanding field of food and nutrition related entrepreneurial ventures and program initiatives. Graduates are poised to meet within food and nutrition industries the demand for the application of valid nutritional concepts.

Concurrent program options

Students pursuing concurrent degrees (also known as a "double major") earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Admission requirements

General university admission requirements:

All students are required to meet general university admission requirements.

Tuition information

When it comes to paying for higher education, everyone's situation is different. Students can learn about [ASU tuition and financial aid](#) options to find out which will work best for them.

Change of Major Requirements

Students should visit the [Change of Major form](#) for information about how to change a major to this program.

Transfer options

ASU is committed to helping students thrive by offering tools that allow personalization of the transfer path to ASU. Students may use [MyPath2ASU®](#) to outline a list of recommended courses to take prior to transfer.

ASU has [transfer partnerships](#) in Arizona and across the country to create a simplified transfer experience for students. These pathway programs include exclusive benefits, tools and resources, and they help students save time and money in their college journey.

Global opportunities

Global experience

In the field of nutrition, [study abroad](#) can expose students to unique health environments and expand students' knowledge of culturally specific health approaches. Students gain a deeper understanding of how

food and culture intertwine and how to communicate nutritional and sanitary standards to a diverse audience. Students' resumes are enhanced with the heightened communication, cultural competency and critical thinking skills they acquired through study abroad.

The College of Health Solutions recommends these [study abroad programs](#) for students majoring in nutrition.

Career opportunities

Nutrition graduates are prepared for careers within companies looking to innovate, in the delivery of products and services, in research and development, in management of food service and sustainable food systems, and in nutrition and health communication and promotion. They have the capabilities to launch startups and businesses focused on individual practice, consulting, and new product and service development. There are a wide array of career opportunities available for graduates of this program.
