Urban Design, MUD

Do you love studying cities? Are you interested in designing public spaces? Become an urban designer able to shape communities and tackle complex challenges like adapting to climate change, addressing systemic injustice, integrating nature-based solutions, building urban resilience, and achieving sustainable development goals.

Program Description

Degree Awarded: MUD Urban Design
The Master of Urban Development at The Design School is a transdisciplinary post-professional graduate program that provides students with actionable knowledge of urban design and enables students to lead urban transformations for community and urban resilience.

Students study and apply newly emerging design knowledge from architecture, landscape architecture, creative placemaking and keeping, urban planning, community development, civil engineering and real estate development. Students also draw from critical works in non-design disciplines including climate science, social justice, sustainability science, urban ecology, urban climate, natural resources management, environmental psychology, anthropology, arts, histories, smart city, laws and systems theory.

The MUD offers a 12-month curriculum built around the analysis and understanding of the dynamic urban systems specific to rapidly urbanizing regions of the world. The program leverages the Phoenix metro area as a learning laboratory through a number of challenges --- the rapidly expanding metropolis, the scarcity of water resources, the extreme heat and climatic conditions, and the area's unique ecological and cultural diversity --- in the development of responsible global initiatives and innovative design strategies for urban environments.

This program addresses the urban design transformations that are needed in order to build just, sustainable and resilient cities.
At a Glance

- **College/School:** Herberger Institute for Design and the Arts
- **Location:** Tempe

Degree Requirements

36 credit hours including the required applied project course (MUD 593)

**Required Core (10 credit hours)**
MUD 521 Advanced Urban Design Studio I (5)
MUD 522 Advanced Urban Design Studio II (5)

**Electives (9 credit hours)**

**Other Requirements (12 credit hours)**
DSC 598 Topic: Principles of Collaboration in Design (3)
LAP 598 Topic: Smart City Sustainability and the Environment (3)
MUD 598 Topic: Great Cities (3)
MUD 598 Topic: Urban Issues (3)

**Culminating Experience (5 credit hours)**
MUD 593 Applied Project (5)

Additional Curriculum Information

Students should see the academic unit for an approved design professional elective list.

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the Herberger Institute for Design and the Arts.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. portfolio
4. letter of intent
5. two references
6. proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency through either the TOEFL or the IELTS regardless of their current residency. The minimum score for admission to the program is 80 on the TOEFL iBT or an overall band score of 6.5 on the IELTS.

Other information for international applicants can be found at the English proficiency for international graduate students page.

Applicants who hold a studio-based four-year undergraduate design degree are considered for the one-year MUD program. The Master of Urban Design is a postprofessional program.

Applicants must hold an undergraduate or graduate degree from a college or university recognized by ASU in a studio-based design discipline.

The portfolio, letter of intent and contact information for three references need to be submitted to SlideRoom (https://asudesign.slideroom.com/#/Login). The Design School requires that these be submitted in addition to the graduate admission application requirements.

Admission to the program is selective. Admission cannot be deferred; students must enroll in the semester for which they are admitted, otherwise they will need to go through the entire application process again for the year in which they are applying.

Applicants may be admitted to the one-year program with deficiencies if their previous coursework is not equivalent to the ASU undergraduate requirements and standards. Deficiencies must be completed prior to taking the required courses, if necessary. This may cause the student to take longer than one year to complete the program.

A personal interview is not required; however, a candidate wishing to visit the school is welcome, and the candidate should make arrangements by contacting the department.

Tuition Information
When it comes to paying for college, everyoneâs situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Application Deadlines
Fall expand

Career Opportunities
Graduates are prepared to work in a diverse spectrum of positions in the design field within public and private sectors and not-for-profit organizations. Some examples for the type of work include:

- climate change mitigation and adaptation
- community development
- creative placemaking and placekeeping
- environmental and climate justice
- low-impact development
- public health and cities
- smart cities
- sustainable cities
- transit-oriented design
- urban and community resilience
