

# Interdisciplinary Studies, MA

ASINTERMA

Opportunities and challenges in the world are rarely one-dimensional, and solutions often require skills from multiple disciplines. You can custom-build your master's degree program into an outside-the-box experience and perspective.

## Program description

### Degree awarded: MA Interdisciplinary Studies

The MA degree in interdisciplinary studies is an innovative program in which students learn how to use two or more disciplines in an integrative method that leads to new discoveries. Founded on the conviction that solving today's problems often requires an interdisciplinary approach, this flexible program provides study of interdisciplinary and transdisciplinary perspectives, interdisciplinary research methods and modes of inquiry and practice.

The program consists of three required MAS courses, six courses of the student's choice and a capstone the final semester, and gives students access to faculty members who are active practitioners of interdisciplinary inquiry. Working with the faculty, students may define their own area of emphasis or adopt an existing area within the humanities, arts and social sciences.
