Social Technologies, MA

ASSTCMA

Social media manipulates opinions and influences people's views of the world. Gain a deeper understanding of the technology that powers social media's grip on society and learn tools and insights to quantify those effects.

Program Description

Degree Awarded: MA Social Technologies
The MA degree program in social technologies is for those interested in the ways new kinds of social data introduce challenges and opportunities to society.

The program combines a thorough grounding in digital social science with the skills needed for engaging in the analysis of social data. This unique combination provides graduates with the ability to understand and contribute to creating ethical social platforms. They are also well positioned to advise institutions, businesses and government agencies on appropriate policies, and to draw on large-scale trace data to help address significant social issues.

The rapid shift toward algorithmic structures of social interaction represents one of the most significant challenges to society, and the questioning of equity, privacy and autonomy has become a recurring theme running through many modern social problems. These technologies also may provide the keys for addressing substantial social issues. The critical analysis of these socio-technical systems requires both technical abilities and an understanding of social theory.

ASU offers a Master of Arts in social technologies for those interested in engaging research at the intersection of data and society, preparing them to become leaders in social data science. Students in the program work through a series of courses that provide a grounding in social theory and digital research methods as well as opportunities to apply that knowledge to social issues.

At a Glance
Accelerated Program Options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Biology, BA
- Environmental Science, BA
- Psychology, BA
- Psychology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and how to apply.

Degree Requirements

33 credit hours including a thesis, or
33 credit hours including the required capstone course (STC 570)

Required Core (27 credit hours)
STC 501 Theories of Data and Society (3)
STC 510 Data Wrangling (3)
STC 512 Data, Places, People and Things (3)
STC 527 Ethics and Policies of Social Data (3)
STC 536 Networked Publics (3)
STC 537 Technologies of Community (3)
STC 539 Social Search and Filtering (3)
STC 550 Computational Social Methods I (3)
STC 551 Computational Social Methods II (3)

Other Requirements (0 or 3 credit hours)
STC 528 Communicating Data Science (3)

Culminating Experience (3 or 6 credit hours)
STC 570 Social Data Projects (3) or
STC 599 Thesis (6)

Additional Curriculum Information
Students complete either a three credit hour capstone course (STC 570 Social Data Projects) or a six credit hour thesis (STC 599). Students who choose to complete the capstone course also complete STC 528.
Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the New College of Interdisciplinary Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree, in any field, from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. statement of purpose
4. an academic writing sample (preferred) or professional writing sample
5. GRE scores (optional)
6. proof of English proficiency

Additional Application Information

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The statement of purpose should describe the educational background, scholarly interests and academic and professional goals of the applicant.

GRE scores are recommended, but not required for all applicants. Applicants who have a GPA of less than 3.00 in the last 60 credit hours of the bachelor's degree are strongly encouraged to provide GRE scores.

Tuition Information

When it comes to paying for college, everyone's situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Attend Online

ASU Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program’s ASU Online page for program descriptions and to request more information.

**Career Opportunities**

Graduates of the Master of Arts program in social technologies should be well-positioned for research roles in businesses, nonprofits and government organizations, working with organizations to help them make ethical and effective use of social data, consulting on broader issues of social change and networked technologies. They also may continue on to doctoral work in cognate fields.

The program deliberately seeks to be more reflective of the diversity of those who are affected by datafication and actively promote the careers of professionals who are underrepresented in data-related fields.

Career examples include:

- chief information officer
- communications director
- community manager
- data journalist
- intelligence or policy analyst
- program or project manager
- public affairs specialist
- social media manager
- social strategist
- research and data analyst
