Health Informatics, MAS

Earn a master's degree covering the effective use of information technology, data science and knowledge representation, to impact health and health care.

Program Description

Degree Awarded: MAS Health Informatics
The MAS in health informatics is a flexible program designed to meet the needs of working professionals. Core courses provide a background in clinical informatics while electives allow students to specialize in areas such as data science or mobile health. Focus areas include workflows, population health management and data analysis.

**Admission Requirements**

Applicants must fulfill the requirements of the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in a related field such as biology, computer science, medicine, nursing, pharmacy or public health from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants are required to submit:

1. graduate admission application and application fee
2. official transcripts
3. current resume or curriculum vitae
4. two letters of recommendation
5. statement of purpose
6. proof of English proficiency

**Additional Admission Requirements**

An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. TOEFL iBT or IELTS scores must be from tests taken no more than two years prior to the applicant's anticipated start date at ASU.

The personal statement should be a maximum of 500 words that includes the applicant's interest in the program, what they hope to learn and accomplish, and their career goals.

Letters of recommendations must be from current or former professors, or from supervisors of related work experience.

---

**Tuition Information**

When it comes to paying for college, everyoneâs situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Career Opportunities

The degree program prepares graduates with skills for careers in a wide range of health care settings. Professionals from fields outside of health and health care can also develop the skills needed to transition into careers in this rapidly expanding field.

Career opportunities include:

- clinical analyst
- clinical application developer
- clinical informatics manager
- director of clinical informatics (medical informatics)
- director of health information management or health IT
- electronic health record application specialist
- health care data analyst
- health care informatics consultant or manager
- health care IT project manager
- health data resource manager or clinical data manager
