Prepare for a professional or academic career through this program that combines the creative strengths of science and engineering. You can study artificial intelligence, human factors engineering, smart materials and structures, and robot modeling with faculty specializing in the natural sciences, instrumentation design and systems engineering.

Program Description

Degree Awarded: MS Exploration Systems Design (Systems Engineering)
The MS program in exploration systems design with a concentration in systems engineering promotes the development and growth of engineering-literate scientists and science-literate engineers interested in the design, construction and implementation of next generation space missions and large projects.

Its unique curriculum combines science applications with engineering knowledge and skills through engineering and science courses focused on Earth science, space science and astrophysics. The concentration trains students to design the next generation of large projects and space missions for exploration of the Earth, space and the universe.

At a Glance

- College/School: The College of Liberal Arts and Sciences
- Location: Tempe campus

Degree Requirements
30 credit hours including Capstone Course (SES 511)

**Required Core (5 credit hours)**
SES 501 SESE Colloquium (1)
SES 502 Exploring SESE Research (1)
SES 510 Graduate Exploration Project I (3)

**Concentration (9 credit hours)**
EGR 530 Principles of Systems Engineering (3)
EGR 608 Advanced Simulation (3)
EGR 611 Complex Engineering Systems (3)
IEE 573 Reliability Engineering (3)
MAE 547 Modeling and Control of Robots (3)
MAE 557 Mechanics of Composite Materials (3)
MAE 565 Rocket Propulsion (3)
MAE 587 Radiation Heat Transfer (3)

**Electives or Research (13 credit hours)**

**Culminating Experience (3 credit hours)**
SES 511 Graduate Exploration Project II (3)

**Additional Curriculum Information**
Students select three courses from the available concentration coursework.

For elective coursework, students select from the AST, GLG, SES or engineering courses in consultation with their faculty advisor. Six credit hours must be science coursework approved by the faculty advisor. Other courses can be used with academic unit approval.

**Admission Requirements**

Applicants must fulfill the requirements of both the Graduate College and The College of Liberal Arts and Sciences.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in engineering, physical science or a related field from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. written statement
4. three letters of recommendation
5. proof of English proficiency

**Additional Application Information**
An applicant whose native language is not English must provide proof of English proficiency regardless of current residency.

**Application Deadlines**

**Career Opportunities**

The U.S. Department of Labor predicts that the economy will add an additional 63,000 jobs in engineering fields related to systems engineering and exploration systems design (involving electrical and electronics, aerospace and mechanical engineering). This is in addition to the 900,000 jobs already existing in the economy in these fields: [https://www.bls.gov/ooh/architecture-and-engineering/home.htm](https://www.bls.gov/ooh/architecture-and-engineering/home.htm).

The state of Arizona has a considerable presence from aerospace and other technology companies with high demand for skilled labor. In particular, local aerospace companies have high demand for students with direct experience and training in the space sector. The concentration in systems engineering is uniquely positioned to provide this training.
