Biomedical Diagnostics, MS

This online master's degree program provides a unique educational opportunity in the field of biomedical diagnostics for a diverse and multidisciplinary group of students. In this one-year program, through a blended, global classroom setting, you receive the fundamentals of diagnostics and practical learning experiences.

Program Description

Degree Awarded: MS Biomedical Diagnostics
The MS program in biomedical diagnostics can be completed in one year, if enrolled full-time. Students studying biomedical diagnostics gain insights into a growing industry that is at the center of health care innovation and personalized medicine. The biomedical diagnostics program has been designed by expert faculty with significant experience in the business, legal and technical facets of diagnostics.

Students in the biomedical diagnostics program will generally progress through the four foundational areas:

- application of diagnostics
- business of diagnostics
- science of diagnostics
- technology of diagnostics

Students complete a culminating experience, the biomedical diagnostics applied project, in which they work with their fellow students on a team-based project with diagnostics leaders in industry on a topic relevant to the field.

At a Glance

- College/School: College of Health Solutions
• Location: Online

**Degree Requirements**

31 credit hours including the required applied project course (BMD 593)

**Required Core (19 credit hours)**

- BMD 502 Foundations of Biomedical Informatics Methods I (3)
- BMD 510 Current Perspectives in Biomedical Diagnostics (3)
- BMD 511 Health Economics, Policy and Payment Models (3)
- BMD 513 Principles of Diagnostic Technology: Immunoassays (4)
- BMD 514 Principles of Diagnostic Technology: Molecular Diagnostics (3)
- BMD 667 Regulation of Medical Diagnostics (3)

**Electives (6 credit hours)**

**Research (3 credit hours)**

- BMD 592 Research (3)

**Culminating Experience (3 credit hours)**

- BMD 593 Applied Project (3)

**Additional Curricular Information**

Students should see the academic unit for a list of approved elective courses. BMD 592 and BMD 593 are contiguous courses and cannot be taken in different academic years.

**Admission Requirements**

Applicants must fulfill the requirements of both the Graduate College and the College of Health Solutions.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a regionally accredited college or university in one of the following fields, or a closely related field: biomedical informatics, biology, life sciences, chemistry, biochemistry, engineering, biomedical engineering, business, computer science, supply chain management, health sciences or medical studies.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. two letters of recommendation
4. professional resume or curriculum vitae
5. statement of purpose
6. proof of English proficiency

Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The one- to two-page statement of purpose should include the applicant's interest in the program, what they expect to learn from the program, their professional goals, and a short description of their background in the sciences.

The professional resume should be one to two pages and include relevant professional, educational and personal experience.

Tuition Information
When it comes to paying for college, everyone's situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Attend Online
ASU Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page for program descriptions and to request more information.

Fall
Spring

Career Opportunities
Professional opportunities are quite broad and depend on the individual's educational and work backgrounds as well as the personal interests of the student. Graduates can pursue diverse options such as executive leadership, competitive intelligence, research and development, laboratory management or entrance to professional school. The following career examples are just a small portion of the possibilities:

Analysts
• clinical research
• competitive intelligence
• quality assurance
• research lab

Department Heads

• diagnostics
• laboratory
• regulatory compliance
• research and development

Managers

• accounts
• clinical research
• marketing and sales
• medical and health services
• product
• quality control
• research lab

Technologists

• clinical lab
• research lab
