Clinical Research Management (Regulatory Science), MS

NUCRMRSMS

Program Description

**Degree Awarded:** MS Clinical Research Management (Regulatory Science)

Regulatory science addresses the safety, efficacy, quality and regulation of new medical products, diagnostics and treatments. Regulatory affairs ensure new products meet the requirements and standards set by regulatory authorities. This master's program aligns regulations and national competencies throughout the lifecycle of medical products. With a master's degree in clinical research management, and a focus on regulatory science, graduates may have the ability to advance medical care and treatment while ensuring new discoveries adhere to rules and regulations that keep patients safe.

The regulatory science concentration of this program provides students a balance of clinical research management and regulatory affairs and sciences. Coursework in this rigorous program includes regulatory writing techniques, quality assurance, medical devices and drugs, and pharmaceutical safety and risk management, ethical standards and regulation in addition to clinical trial management.

This program meets the needs of professional adult learners and provides the flexibility of online courses and allows enrollment five times per year. Students can complete the program on a part-time basis allowing them to continue to work while earning this masters degree.

This clinical research management graduate degree is the first clinical research graduate degree to receive accreditation from the Commission on Accreditation of Allied Health Education Programs. The CAAHEP is the largest programmatic accredits in the health sciences field and is recognized by the Council for Higher Education Accreditation in the U.S. and internationally.

- **College/School:** Edson College of Nursing and Health Innovation
Degree Requirements

33 credit hours including the required capstone course (HCR 566)

**Required Core (18 credit hours)**
- HCR 551 Clinical Research Monitoring (3)
- HCR 561 Responsible Conduct of Clinical Research (3)
- HCR 562 Clinical Research Data Management and Technology Implementation (3)
- HCR 563 Fundamentals of Regulatory Affairs (3)
- HCR 565 Clinical Research Operations (3)
- HCR 574 Scientific and Research Review Boards (3)

**Concentration (12 credit hours)**
- HCR 553 Quality Assurance and Clinical Research (3)
- HCR 555 Pharmaceutical Safety and Risk Management (3)
- HCR 557 Clinical Research Design and Methods (3)
- HCR 564 Global Regulatory Affairs Leadership (3)
- HCR 567 Research Management and Contemporary Research Topics (3)
- HCR 578 Legal Aspects of Clinical Research (3)
- HCR 579 Translational Research in Drug Discovery and Development (3)

**Culminating Experience (3 credit hours)**
- HCR 566 Clinical Research Management Capstone (3)

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the Edson College of Nursing and Health Innovation.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 credit hours or 90 quarter hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. resume or curriculum vitae
4. three online references
5. proof of English proficiency

**Additional Application Information**
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The applicant must have six months of full-time, related clinical research work or internship experience as described in a resume or curriculum vitae. Applicants without six months of experience are required to complete the research foundation courses provided through the program prior to enrollment in any courses.

The online references should be from colleagues, supervisors or other professional contacts and should attest to the applicant's academic and leadership experiences.

Courses or a background in anatomy, physiology and medical terminology are recommended.

**Tuition Information**

When it comes to paying for college, everyone's situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

**Attend Online**

**ASU Online**

ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page for program descriptions and to request more information.

**Application Deadlines**

**Fall** expand

**Spring** expand

**Summer** expand

**Career Opportunities**

Graduates with an MS in clinical research management with a focus on regulatory science have a range of career opportunities to explore. Career examples include:

- clinical research associate
- project manager
- quality control specialist
- regulatory affairs manager
• regulatory affairs specialist
