Regulatory Science (Food Safety), MS

NURGSCFSMS

Program Description

Degree Awarded: MS Regulatory Science (Food Safety)
The MS program in regulatory science with a concentration in food safety is an online program that covers contamination concerns and regulations throughout the food supply chain, from growing to distributing to selling. Courses analyze food safety regulations from local, state and federal agencies, including the U.S. Food and Drug Administration. Students also gain an understanding of the ethical and legal challenges of food safety and regulation.

The food safety concentration explores various aspects of food safety including inspections, hazard analysis, safe food practices and the handling of food emergencies. Students learn how to identify food safety issues through the use of videos and simulations and write reports on their findings. The applied learning in the program directly relates to the type of food safety problems that most frequently occur in the preparation, storage and processing of food.

This food safety master's degree is also unique in that it aligns with the content on the Certified Professional Food Manager certification exam from the National Environmental Health Association. While the degree doesn't result in certification, the program helps prepare students to take the NEHA exam.

Edson College of Nursing and Health Innovation highly recommends, but does not require, Introductory Chemistry (3 credits + 1 credit lab) and Introductory Biology (3 credits).

Students are responsible for the comprehension of the requirements of optional certification exams, credentials and employment eligibility with specific organizations. The university cannot verify students will be eligible to take or to pass exams. To successfully acquire professional certifications and credentials and to even be eligible to test for these, students may need prior work experience, additional coursework, fieldwork and background checks. Students should refer to the National Environmental Health Association (www.neha.org) for general information.

- **College/School:** Edson College of Nursing and Health Innovation
- **Location:** Online

Degree Requirements

33 credit hours including the required applied project course (HCR 593)

**Required Core (18 credit hours)**
- HCR 553 Quality Assurance and Clinical Research (3)
- HCR 561 Responsible Conduct of Clinical Research (3)
- HCR 563 Fundamentals of Regulatory Affairs (3)
- HCR 576 Drug Discovery, Development and Regulations (3)
- HCR 577 Global Regulatory Affairs (3)
- HCR 578 Legal Aspects of Clinical Research (3)

**Concentration (12 credit hours)**
- HCR 543 Food Safety and Protection (3)
- HCR 544 Assessing Food Safety and Developing Policy Procedures and Training (3)
- HCR 550 Quality Assurance and Safety in Food and Dietary Supplements (3)
- HCR 558 Technical Writing for the Regulatory Professional (3)

**Culminating Experience (3 credit hours)**
- HCR 593 Applied Project (3)

**Additional Curriculum Information**
The culminating experience is an applied project course that includes a project based on a food topic studied during the degree program. Students choose a scientific, technical or regulatory project that includes a research protocol or professional presentation to industry professionals.

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the Edson College of Nursing and Health Innovation.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's science-based or related field degree from a regionally accredited institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.
Applicants are required to submit:

1. graduate admission application and application fee
2. official transcripts
3. two letters of recommendation
4. professional resume
5. written statement
6. proof of English proficiency

Additional Application information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

Tuition Information
When it comes to paying for college, everyone's situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Attend Online
ASU Online

ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page for program descriptions and to request more information.

Career Opportunities
Graduates from the regulatory science degree program, with a concentration in food safety, are well suited for a variety of jobs in food safety and regulatory science. In particular, they are prepared for local, state and federal regulatory careers in agencies such as the FDA, the U.S. Department of Agriculture, state and county health departments, and food manufacturers.

Food safety regulation is a science focused on the safe handling, distribution, selling and preparation of food. Professionals in the food safety industry conduct site inspections, assess food safety hazards, develop preventative food safety procedures, create food safety policies and more depending on the position. No matter the job, the goal in food safety and regulation positions is always to protect the consumer.

Regulatory science and food safety careers include:

- environmental health specialist
- facility manager
- food inspector
- food-safe chemical supplier
Professional Licensure

ASU programs that may lead to professional licensure or certification are intended to prepare students for potential licensure or certification in Arizona. Completion of an ASU program may not meet educational requirements for licensure or certification in another state. For more information, students should visit the ASU professional licensure webpage.
