Regulatory Science, MS

NURSHSMS

Program Description

Degree Awarded: MS Regulatory Science
The MS program in regulatory science is designed for students interested in protecting public health through the discovery, development and marketing of medical products to the consumer. In particular, the ASU regulatory science program focuses on drugs and devices, preparing students for careers in the pharmaceutical, medical research and medical device industries.

The field of regulatory science focuses on the application of regulations throughout the lifecycle of medical products and compliance with regulations in the development, approval and marketing of medical products. This advanced degree incorporates a transdisciplinary approach to meet the unique needs of regulating bodies and the industry. While earning the Master of Science in regulatory science, students delve into all aspects of regulatory affairs including drug development, medical device development, manufacturing, regulatory submissions, clinical research, ethics, quality systems, legal aspects and global regulatory practices in the regulatory field.

- **Location:** [Downtown Phoenix](#) or [Online](#)

Degree Requirements

33 credit hours including the required applied project course (HCR 593)

**Required Core (18 credit hours)**
- HCR 553 Quality Assurance and Clinical Research (3)
- HCR 561 Responsible Conduct of Clinical Research (3)
- HCR 563 Fundamentals of Regulatory Affairs (3)
HCR 576 Drug Discovery, Development and Regulations (3)
HCR 577 Global Regulatory Affairs (3)
HCR 578 Legal Aspects of Clinical Research (3)

**Restricted Electives (12 credit hours)**
HCR 552 Medical Device Development and Regulation (3)
HCR 555 Pharmaceutical Safety and Risk Management (3)
HCR 557 Clinical Research Design and Methods (3)
HCR 558 Technical Writing for the Regulatory Professional (3)
HCR 564 Global Regulatory Affairs Leadership (3)
HCR 568 Health Care Project Management (3)
HCR 575 Management and Negotiation of Clinical Trial Budgets and Contracts (3)
HCR 579 Translational Research in Drug Discovery and Development (3)

**Culminating Experience (3 credit hours)**
HCR 593 Applied Project (3)

**Additional Curriculum Information**
For electives coursework, students choose four courses for 12 credit hours from the restricted electives list. Other coursework may be substituted with approval from the academic unit.

**Admission Requirements**

Applicants must fulfill the requirements of both the Graduate College and the Edson College of Nursing and Health Innovation.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree from a nationally recognized, regionally accredited academic institution.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. resume or curriculum vitae
4. two online recommendations
5. personal statement
6. proof of English proficiency
Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency.

The online references should be from professional colleagues, supervisors, professors or other professional contacts and should attest to the applicant's academic and leadership experiences.

Tuition Information
When it comes to paying for college, everyone's situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Attend Online
ASU Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program's ASU Online page for program descriptions and to request more information.

Application Deadlines
Fall
Spring

Career Opportunities
The field of regulatory affairs continues to grow as pharmaceutical and medical development advances. Companies are eager to hire regulatory science professionals into jobs such as:

- compliance officer
- FDA inspector
- quality assurance specialist
- quality control specialist
- regulatory affairs professional
- regulatory coordinator
- regulatory manager
- regulatory scientist
