Information Technology, MS

Program Description

Degree Awarded: MS Information Technology
The MS program in information technology is a transdisciplinary program that prepares students to be industry leaders in the public and private sectors.

Students gain the technical competencies they need to design and develop information technology projects that interconnect people, process and technology to meet the needs of stakeholders and users.

The coursework emphasizes core technologies, and students select from two areas of focus: information technology security or information systems management.

- **College/School:** Ira A. Fulton Schools of Engineering
- **Location:** Polytechnic or Online

Accelerated Program Options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

Information Technology, BS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program. Interested students can learn about eligibility requirements and [how to apply](#).
Degree Requirements

30 credit hours and a portfolio, or
30 credit hours including the required applied project course (IFT 593)

Required Core (12 credit hours)
IFT 510 Principles of Computer and Information Technology Architecture (3)
IFT 520 Advanced Information Systems Security (3)
IFT 530 Advanced Database Management Systems (3)
IFT 540 Information Systems Development (3)

Open Elective (3 or 6 credit hours)

Focus Area Electives (12 credit hours)

Culminating Experience (0 or 3 credit hours)
IFT 593 Applied Project (3) or
portfolio (0)

Additional Curriculum Information
Students should see the academic unit for a complete list of approved coursework.

Admission Requirements

Applicants must fulfill the requirements of both the Graduate College and the Ira A. Fulton Schools of Engineering.

Applicants are eligible to apply to the program if they have earned a bachelor's or master's degree in information technology, computer science, applied computing, engineering or a closely related field from a regionally accredited college or university.

Applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in the last 60 hours of their first bachelor's degree program, or applicants must have a minimum cumulative GPA of 3.00 (scale is 4.00 = "A") in an applicable master's degree program.

All applicants must submit:

1. graduate admission application and application fee
2. official transcripts
3. personal statement
4. professional resume
5. proof of English proficiency
Additional Application Information
An applicant whose native language is not English must provide proof of English proficiency regardless of their current residency. Applicants should see the Graduate Admission Services website.

Unofficial transcripts may be submitted at time of application. If admitted, applicants must then submit official transcripts to ASU Graduate Admission Services.

If the applicant does not meet the minimum GPA requirements, the application may still be considered. In certain cases, demonstrated aptitude through professional experience or additional postbaccalaureate education are considered.

Tuition Information
When it comes to paying for college, everyone's situation is different. Students can learn about ASU tuition and financial aid options to find out which will work best for them.

Attend Online
ASU Online
ASU offers this program in an online format with multiple enrollment sessions throughout the year. Applicants may view the program’s ASU Online page for program descriptions and to request more information.

Fall
Spring
Summer

Program Learning Outcomes
Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Integrate theories and concepts of information technology in their master applied technology research and industry careers.
- Build client-centered technology solution through the synthesis of best practices and transdisciplinary research.
- Conduct industry relevant research and communicate results effectively to diverse audiences.

Career Opportunities
Graduates of the information technology program are well qualified for careers in the management of IT departments as this degree couples technical skills with the business skills needed to manage technical functions. Some graduates may pursue careers as technical support staff based on the focus area and secondary skills they achieve. Graduates also have the ability to manage technical professionals within their focus areas.
